Preview Reflection Guide

To be more proactive about new technology use in the classroom, this reflection guide will help you navigate the usefulness of any new technology you want to use with students.

Plan your activity. List learning goals and objectives. Will this tech meet those expectations?	
Anticipate challenges. What exactly will students struggle with? How can you prepare students for these challenges?	
Accommodate. Think about all your learners and their unique needs. What modifications are needed to reach all learners?	
Reflect. What did you enjoy about the tech? What do you think your students will enjoy most?	
Evaluate. What other activities might this technology be useful for? Make a list.
